

## Working Student in Software Development (Frontend or Backend)

# Be part of the future of mobility – Help us shape sustainable, digital solutions!

We are looking for a Software Developer to join our innovative startup xatellite!

---

We have an exciting Frontend or Backend position available starting immediately. Contribute to revolutionizing international railway ticketing! At xatellite, you'll have the opportunity to develop your skills with modern technologies, take ownership of your work, and actively contribute to shaping our open-source products.

### What we offer:

- **Flexible working hours:**  
20h/week at €15-18 per hour (€1,200-1,440/month), initially limited to one year
- **Remote or hybrid work:**  
Fully remote within CET  $\pm 2$  or work from our office at Praterstern in Vienna
- **Creative freedom:**  
Flexible work schedule and the opportunity to bring in your own ideas

**Who we are:** A young startup committed to sustainable mobility. Our goal is to improve travel planning, passenger information, and ticketing in the railway sector.

### Current projects:

- Developing an open-source ticketing system for small and mid-sized railways (OpenTrainTicketing)
- Researching and evaluating technical standards for public transport integration
- Providing a European railway timetable dataset (OpenTimetable.eu)

**Who we're looking for:** You're a good fit if you're interested in international rail transport and ideally have some experience with our technologies or in project management.

**Our Tech Stack:** Rust (Axum + Diesel), PostgreSQL, VueJs (Typescript, Vue3), GRPC / OpenApi, Kubernetes (ArgoCD, Gitlab CI/CD)

**Interested?** Check out [xatellite.space](https://xatellite.space) for more info! We look forward to your application with a CV and motivation letter at [join@xatellite.space](mailto:join@xatellite.space)!
